- System Analysis and Design
- Data Structures and Algorithms
- Communication skills

ABOUT

I am a final-year student studying information technology, and I am interested in using technology to inspire creativity and find solutions to challenging issues. I have built a solid foundation in data analysis, network security, and software development over my academic career. My desire to be at the forefront of technological advancements drives me to keep learning and developing in this constantly changing industry. To provide meaningful solutions, I am eager to expand my knowledge, contribute to current studies, and work with like-minded individuals.

WORK EXPERIENCE

PROMOTOR

Samplex Africa

November 2021 - February 2022

In my role, I was responsible for visiting various stores assigned to me and promoting Xiaomi smartphones to customers. Given that Xiaomi was not a well-known brand in South Africa at the time, many customers were unfamiliar with it. My task was to introduce them to Xiaomi, highlighting the brand's unique features and benefits to encourage them to consider purchasing these smartphones.

STUDENT ASSISTANT

North-West University

March 2023- November 2023

I got the opportunity to help students who were having trouble with the Descriptive Statistics and Inference module. In this position, I helped individuals one-on-one by breaking down difficult ideas and assisting them in solving difficult challenges. In addition, I worked with the lecturer to ensure that student papers were awarded marks fairly and accurately. My knowledge of the subject has improved as a result of this experience, which has also improved my mentoring and communication abilities.
